Dräger Saver PP

The Dräger Saver range of Emergency Escape Breathing Apparatus has been designed using the latest technologies available whilst still bearing in mind our three leading principles; reliability, quality and ease of use.

The Dräger Saver PP is a positive pressure Emergency Escape Breathing Apparatus (EEBA), incorporating a Panorama Nova facemask.

Developed with safety in mind it has been especially designed to be used in conjunction with other forms of Personal Protective Equipment like safety helmets and ear protectors, with little or no encumbrance.

The Dräger Saver PP is extremely compact in design providing greater freedom of movement and ease of storage.

The unit is contained in an instantly recognisable orange carrying bag, incorporating photoluminescent panels. This allows the unit to be seen at very low ambient light and visibility levels. The carrying bag is interchangeable for either chestbag or bandolier wearing positions. It's also washable, flame retardant and waterproof.

Activation and donning are made as uncomplicated as possible to allow for a safer escape. Simply open the carrying system and the Dräger Saver PP is instantly activated. It can be easily re-set in the event of false alarm.

The Dräger Saver PP comes equipped with the Panorama Nova facemask, part of the Dräger product portfolio. The elasticated head harness on the Dräger Panorama Nova means the escape set is easier and quicker to don in emergency situations.

Features of the Dräger Panorama Nova include:

- The Dräger Panorama Nova positive pressure face mask offers a higher level of protection, providing low exhalation resistance,
- A close and comfortable fit
- Self demisting visor for clear vision

During an escape situation a warning whistle sounds when the unit is nearing the end of its air supply, this is to help ensure the user knows when they need to be in a safe breathing environment.

The proven reliability of the pneumatic principles used on the Dräger PA90 and Dräger PA90 Plus, have been adapted for use throughout the Dräger Saver range. This design provides extremely low breathing resistance and a consistent air flow rate at all cylinder pressure levels.

The Dräger Saver PP provides breathing air for 10 or 15 minutes, according to cylinder size and is fully approved to EN402, Lloyd's Register Certificate of Fire Approval and Lloyd's Register Certificate of Type Approval. The Dräger Saver PP also complies with SOLAS Chapter I I-2, The Marine Equipment Directive and The Pressure Equipment Directive.

Low cost of ownership

- No mandatory routine service is required for a period of 10 years.*
- The cylinder can be charged using standard charging connectors with no special tools or adaptors.

*Cylinder certification is required according to national regulations.

TECHNICAL DATA

	Dräger Saver PP10	Dräger Saver PP15
Weight (Kg)	4.92	6.18
Length (mm)	490	490
Width (mm)	160	160
Height (mm)	250	250
Cylinder Free Capacity (litres)	400	600
Cylinder Water Capacity (litres)	2	3
Maximum Working Pressure (bar)	200	200
Medium Pressure (bar)	6-9	6-9
Airflow to Hood (bar)	Potentially 500L Per Min	Potentially 500L Per Min
Operating Temperature Range (°C)	-15 to +60	-15 to +60
